FM-1 SKIN TEST SHEET T1

Print at 100%, High quality, one-sided. Media setting: _____ Vinyl: _____ Date: _____

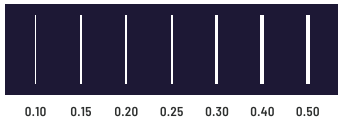

50 mm
outside edges

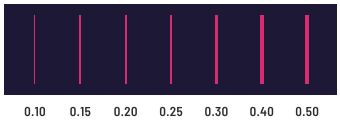

LINES ON WHITE

REVERSED

PINK ON INDIGO

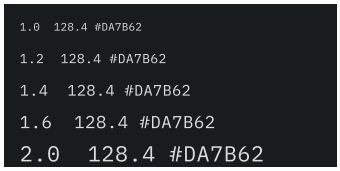

TEXT ON WHITE

REVERSED

MONO ON DARK

LAMINATE THE RIGHT HALF ONLY (right of the dashed line). Leave the left half bare.

BARE: print-safe colour | the brief's original

LAMINATED: print-safe colour | the brief's original

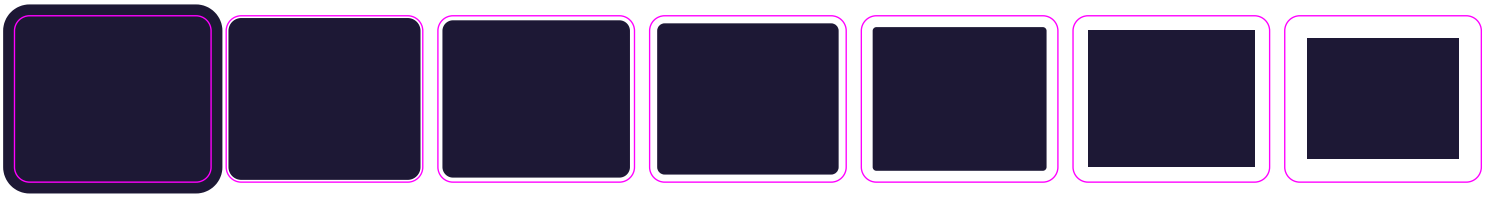

BARE: darks (dry test, then a damp-finger rub)

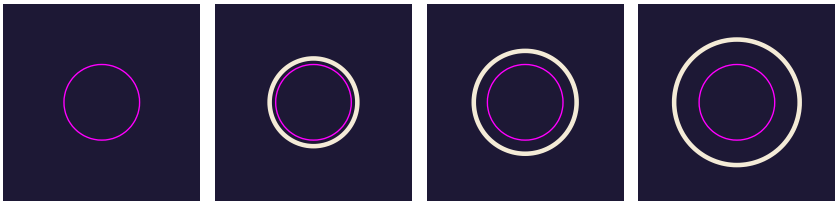

LAMINATED: darks (dry test, then a damp-finger rub)

EDGE TEST: cut each box on the magenta line. Where does a hand-cut edge make the gap look uneven?

KNOB HOLES: cut the magenta circles (10 mm, as on the skin). Does a ring near the hole show the cut?

Scraps from these cuts make good rub and peel test pieces: keep them.

Printed with: lp -d HP_ENVY_6000_series -o media=A4 -o print-scaling=none -o Duplex=None -o cupsPrintQuality=High -o MediaType=_____

testsheets.py T1 (the colour patches are sRGB; the HP converts them itself)
